

Docunym™

Docunym™ is Specialized Business Software's scalable and easy to integrate document management solution for emerging and mid-market companies as well as departments of large private or public entities. **Docunym™** incorporates flexible workflow process management, OCR and batch scanning capabilities in one affordable package.

SBS can help your organization convert labor intensive, manual operations to automated, error-proof workflow processes utilizing our proven technology. In fact in one of our first **Docunym™** installs the ROI was less than one year!

Docunym™ Advantages:

- Can be either a hosted (SaaS) or on-premise application
- Enables automation of your existing business processes
- Enhances management oversight and quality control
- Allows for high speed batch and single document scanning with barcodes
- Has full text OCR for efficient data entry and retrieval
- Allows for seamless, instant integration with other systems
- Image enables your existing systems sans programming

“Specialized Business Software's system met our goals for automation and has greatly increased productivity as well as customer service...the system integrated very well with existing in-house systems and provided for ease of enhancement in the future. “

-Large U.S. Metropolitan City Income Tax Division Administrator

SBS also provides:

- **Backfile conversion of existing paper files**
- **Importing of existing electronic image files**
- **Custom software development to tailor the system to your needs**
- **Document scanning equipment and consulting**
